FACULTY INCHARGE :

Dr.B FATHIMA KANI
ASSISTANT PROFESSOR
DEPARTMENT OF MATHEMATICS
Dr. ZAKIR HUSAIN COLLEGE , ILAYANGUDI

1.INTRODUCTION :

1.1 OVERVIEW :

Population growth is one of the major concerns of the present world as the human population is not a static factor .Rather it is growing at a very alarming rate . Inspite of the increasing world population the resources of the earth remain constant. Thus, the ability to maintain sustainable development is becoming a major challenge to mankind today . In the last half – century, population growth has proceed at an unprecedented rate with the world population currently 6 billion people . The public health impact of this growth has been tremendous and the implications for the future are equally daunting .

1.2 PURPOSE :

- * Estimate the **basic need for human** , such as demand for food , power ,water ,transportations .

- * **Plan constructions** such as housing , highways etc .

- * Estimate the **labour forces** in various places .

- * Estimate the **potential consumption** in various regions .

- * Benefit **sociological research** , such as providing data about sex ratio or age ratio.

- * UN population fund started operations in 1969 to assume a leading role within UN system in promoting population and **programmes based on the human right of individuals couples to freely determine the size of the families** .

2.PROBLEM DEFINITION & DESIGN THINKING :

2.1 EMPATHY MAP :

Empathy map

Use this framework to develop a deep, shared understanding and empathy for other people. An empathy map helps describe the aspects of a user's experience, needs and pain points, to quickly understand your users' experience and mindset.

[Share template feedback](#)

Build empathy

The information you add here should be representative of the observations and research you've done about your users.

Says

What have we heard them say?
What can we imagine them saying?

Thinks

What are their wants, needs, hopes, and dreams? What other thoughts might influence their behavior?

The point of business strategies the calculation of population is taking more time .

Increasing of population losing the work moreover in the previous year.

It helps us to know about the level of population.

Knowing the average population ,we can balance the working stability.

Using the growth monitoring system , we can calculate the next generation's accuracy .

Increase of population there is no work , decrease of population there is more work pending

The population is measured and noted by a graphs.

The statement of social reformers , in a country the wealth is measured by a populations.

Store there a name and a portrait to empathize with your persona.

Using the data of population , we draw a graph which shows the ups and downs.

The collections of data is helping us to know day to day population , how it's increasing.

It's very hard to work , but we enjoy the field.

It is taking too much of work and time.

In this process , we are taking a census of people's growth in the year.

At the way of tracing , the population is deciding the development of some facility in the world.

This creation is different from our field , but it helps to know new things.

Preparing about unknown things , its hurting us and reminds to us.

Does

What are their fears, frustrations, and

Feels

What are their fears, frustrations, and

2.2 IDEATION & BRAINSTORMING MAP :

2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

Tip
You can select a sticky note and use the pencil (click to select) icon to start drawing.

Person 1

Person 2

Person 3

Person 4

Person 5

Person 6

Person 7

Person 8

3

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

20 minutes

Tip
Add sub-clusterable tags to sticky notes to make it easier to find, browse, organize, and categorize repeated ideas as themes with your team.

GROWTH OF POPULATION...

Subclusters

Subcluster tags

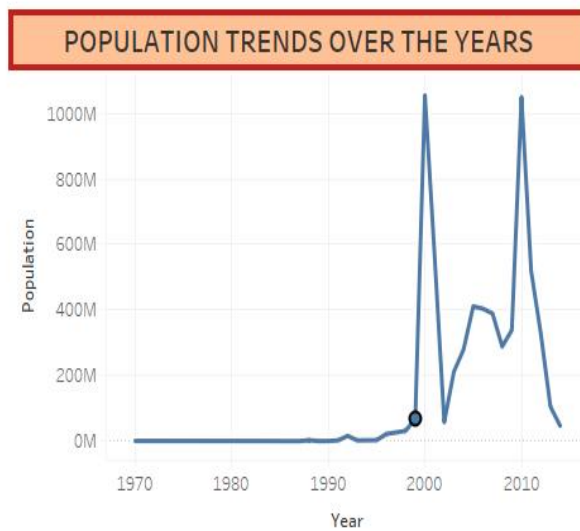

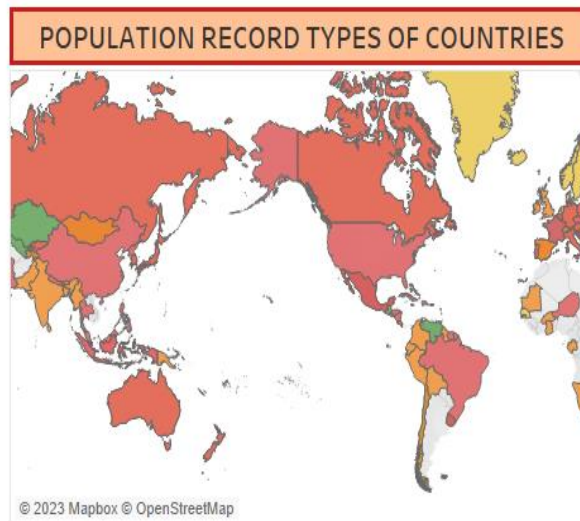

Importance

Rank all these ideas and get down-voted any that you don't want to use, what would have the most positive impact?

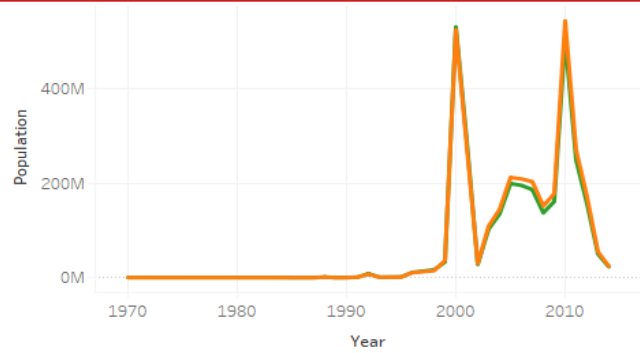

Tip
Participants can use their scores to point and place sticky notes along the x-axis. The facilitator can write the score by using the score system below the sticky notes to help guide.

3 . RESULT :

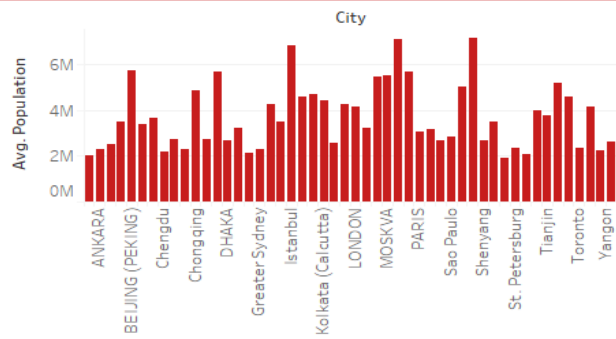

DASHBOARDS AND STORIES :

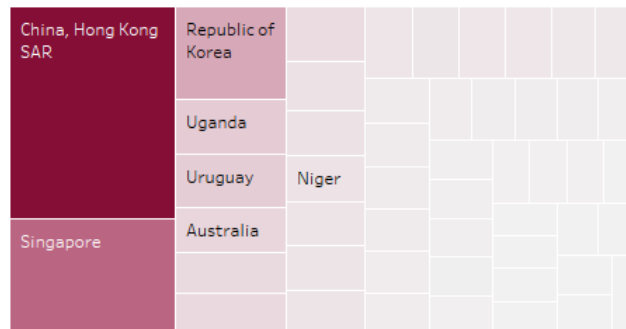

POPULATION TRENDS OVER THE YEARS BY SEX

CITIES WITH HIGHEST AVERAGE POPULATIONS

COUNTRIES WITH HIGHEST AVERAGE POPULATION FROM 2000 - 2014

POPULATION BY CITY TYPE

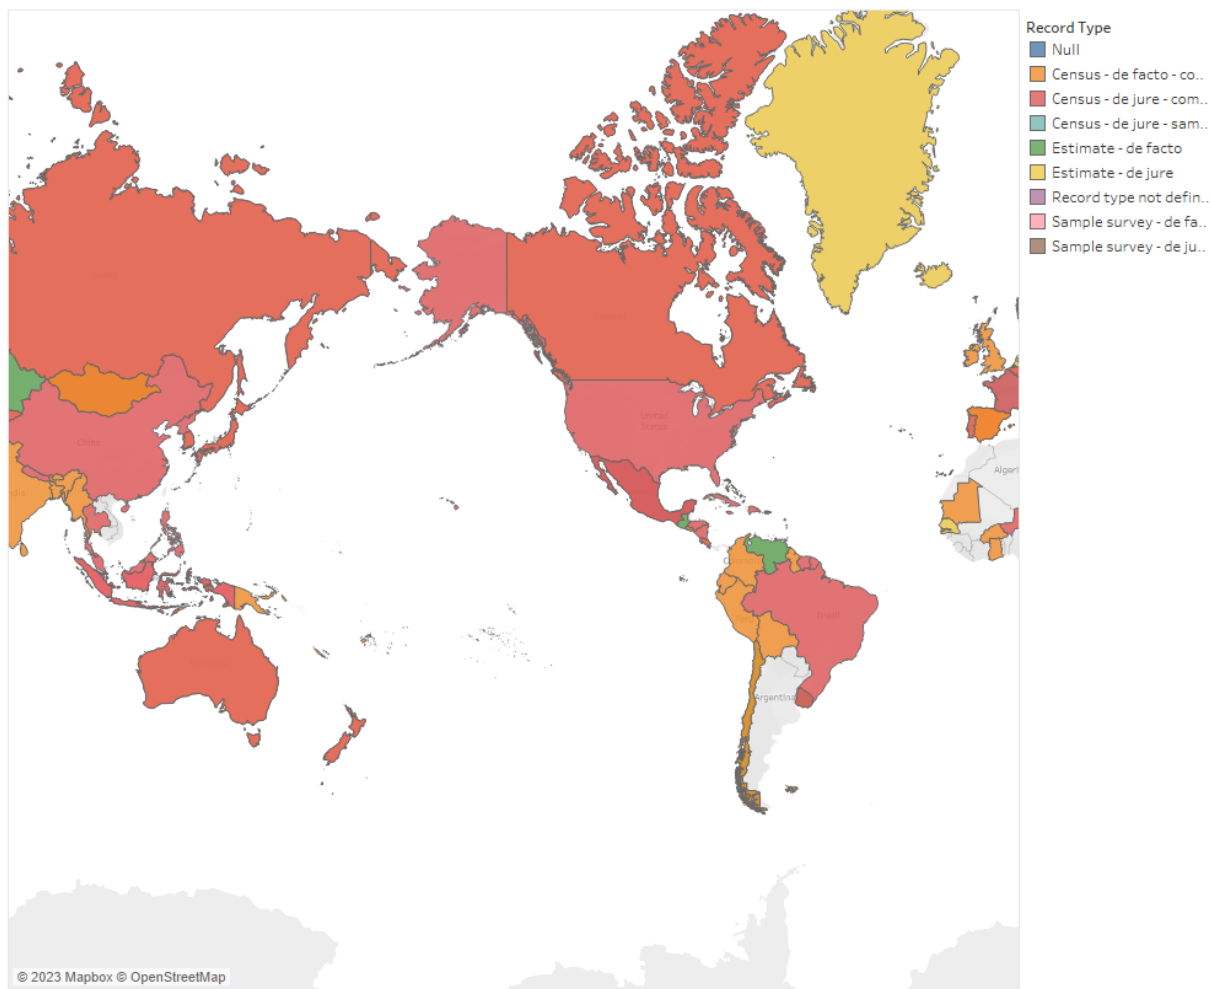

Dashboard 4

- S 1S 2
- S 3S 4
- S 5S 6
- S 7

Story 1

THIS CHART DEMONSTRATES THE POPULATION RECORDS OF TYPES OF COUNTRIES. IT GIVES A CLEAR VIEW OF ESTIMATION OF POPULATION IN VARIOUS COUNTRIES.

Story 2

THIS CHART DEMONSTRATES THE POPULATION TRENDS OVER THE YEARS. IT GIVES A CLEAR VIEW OF PEOPLE COUNT OVER THE YEARS OF VARIOUS COUNTRIES.

Story 3

THIS CHART DEMONSTRATES THE POPULATION TRENDS OVER THE YEARS BY SEX. IT GIVES A CLEAR VIEW OF MALE AND FEMALE COUNTS AMONG TOTAL POPULATION OF VARIOUS COUNTRIES OVER THE YEARS FROM 1970 TO 2014 .

Story 4

THIS CHART DEMONSTRATES CITIES WITH HIGHEST AVERAGE POPULATIONS . IT GIVES A CLEAR VIEW OF CITIES WHICH HAVING A HIGHEST AVERAGE POPULATION OF A TOTAL POPULATION AMONG VARIOUS COUNTRIES.

Story 5

THIS CHART DEMONSTRATES THE COUNTRIES WITH HIGHEST AVERAGE POPULATION FROM 2000 TO 2014 . IT GIVES A CLEAR VIEW OF COUNTRIES WHICH HAVING AN AVERAGE OF HIGHEST POPULATION AMONG VARIOUS COUNTRIES OVER THE YEARS. F..

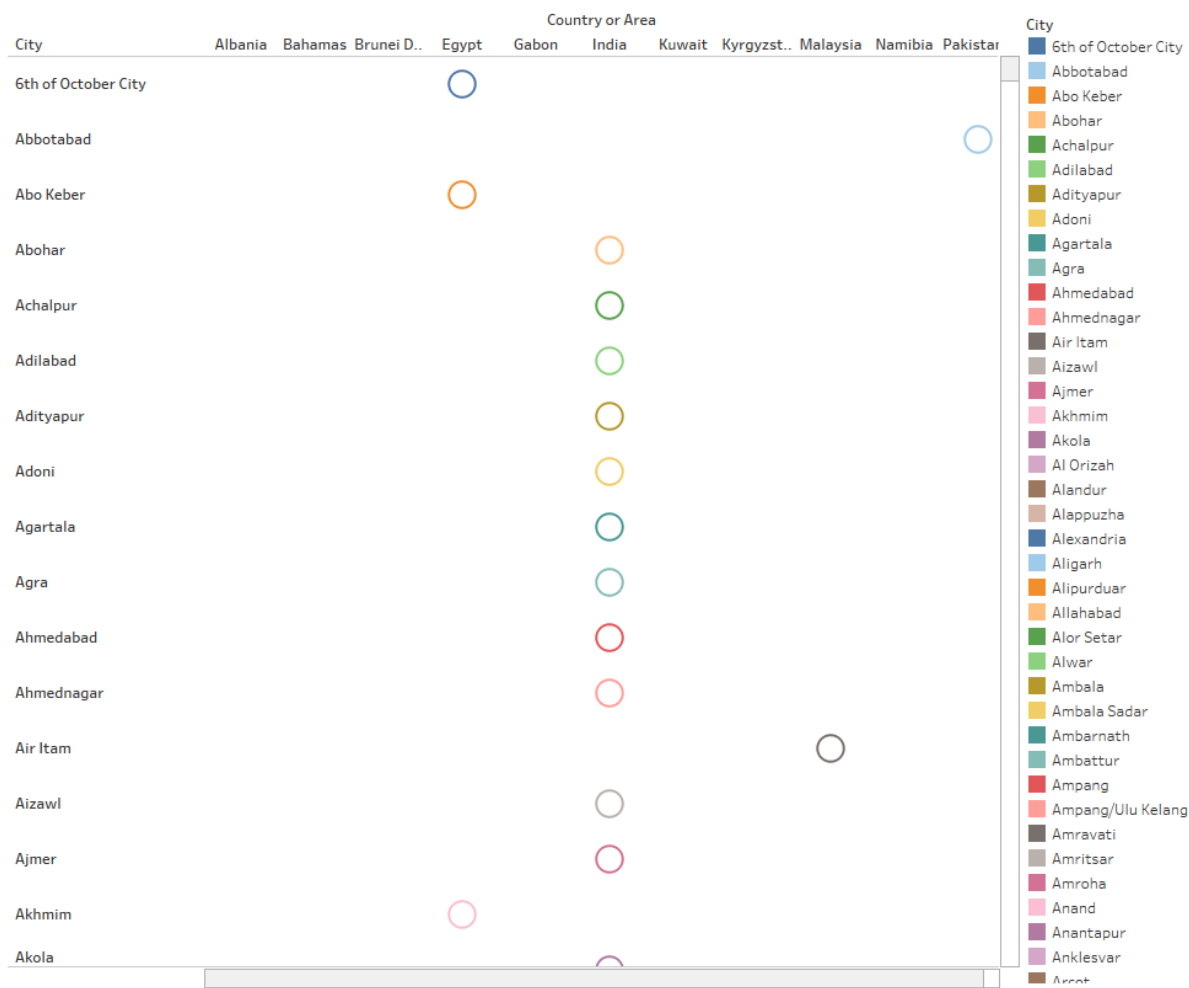

Story 6

THIS CHART DEMONSTRATES POPULATION BY CITY TYPE. IT GIVES A CLEAR VIEW OF THE PERCENTAGE OF THE POPULATION OF THAT CITY TYPE OF VARIOUS COUNTRIES.

Story 7

THIS CHART DEMONSTRATES THE POPULATION OF CITIES BY YEAR. IT GIVES A CLEAR VIEW OF THE POPULATION OF THE CITIES OF VARIOUS COUNTRIES OVER THE YEARS.

WEB APPLICATION :

4. ADVANTAGE & DISADVANTAGE :

ADVANTAGE OF POPULATION:

- * Population growth will lead to **economic expansion** since more people can produce more goods .
- * One obvious advantage that a large population might offer is a large supply of **human resources**.
- * The demand for products and services will rise as the population grows,encouraging **specialization**.
- * More people means a greater demand for products and services,so **more jobs** are needed for production and helps in **nation growth**.
- * The government must spend a lot of money on necessities like housing, health care and education for the **modern updated lifetime**.
- * **High population density** locations are much more **efficient** than rural areas and regions with low populations in terms of the per capita carbon footprint.

DISADVANTAGE OF POPULATION:

- * **Demand** for resources **rises** as the population grows.
- * More people means more people to feed,which **strains food availability**.
- * We are now battling to **process the non-biodegradable waste** that we are producing.
- * More people will produce more **air,water and land pollution**.
- * Cities with a high population density frequently have **traffic problems**.

5. APPLICATIONS:

Field techniques refer to the standardized methods employed to select, count, measure, capture, mark and observe individuals sampled from the target population for the purpose of collecting data required to achieve study objectives. The term also includes methods used to collect voucher specimens, tissue samples and habitat data.

The choice of field techniques to use for a particular species or population is influenced by five major factors:

- * Data need to achieve **inventory and monitoring objectives**.
- * Spatial **extent and duration** of the project.
- * **Life history** and population characteristics.
- * **Terrain and vegetation** in the study area.
- * **Budget** constraints.

6. CONCLUSION :

The world population is projected to reach 8.5 billion in 2030 and to increase further to 9.7 billion in 2050 and 10.4 billion by 2100. As with any type of projection there is a degree of uncertainty surrounding these latest population projections. These figures are based on the medium projections variant, which assumes a decline of fertility of countries where large families are still prevalent as well as a slight increase of fertility in several countries with fewer than two children per woman on average. Survival prospects are also projected to improve in all countries.

7. FUTURE SCOPE :

Developing new methods like fertility regulation and implementing programs of voluntary family planning widely and rapidly throughout the world. Only a few nations have made any concerted efforts in this direction, responsible groups in the social, economic and scientific communities of many countries have become increasingly aware of the problem and the need for intelligent and forthright action. Increased understanding of present procedures and development of new methods for regulating fertility will maximize the freedom of all parents to determine the size of their families even in those countries where population growth is not an urgent social problem but where fertility regulation can have personal significance. It should be

emphasized that the kinds of basic bio medical investigation that will contribute to the solutions of problems of human fertility will also provide information that can be applied to the development of methods for overcoming sterility , for influencing embryonic development in order to repair genetically determined bio chemical deficiencies , for avoiding harmful influences of drugs taken during pregnancy , and for assuring optimum conditions for embryonic and foetal development.
